ANNUAL REPORT

Academic Session 2025–26

The Academic Session 2025–26 commenced on 2nd April 2025 with a warm and engaging Parents' Orientation Programme, designed to welcome students and parents and familiarise them with the ethos, academic framework, and functioning of Techno India Group World School.

The school, which received its CBSE affiliation in December 2024, continued its commitment to providing a stimulating, progressive, inclusive, and student-centric learning environment.

During the session, the school followed the CBSE curriculum from Pre Primary to Grade IX, with a strong emphasis on experiential and activity-based learning. Students were encouraged to explore concepts through hands-on experiences, making learning meaningful, engaging, and relevant to everyday life.

The school continued to nurture environmental consciousness among students and foster a deep sense of responsibility towards Mother Nature. As part of this initiative, students developed and maintained their own kitchen garden, learning about cultivation, sustainability, and the importance of growing food with care. They also actively participated in planting, nurturing, and caring for saplings, contributing towards keeping the school campus and its surrounding neighbourhood green, clean, and aesthetically pleasing. These experiences helped students develop an appreciation for nature while cultivating values of responsibility, patience, and environmental stewardship.

The Art-Integrated Learning approach was incorporated across subjects to encourage creativity, imagination, critical thinking, collaboration, and self-expression. Alongside academics, a wide range of co-curricular and enrichment activities was offered to promote the holistic development of students. These included Yoga, Taekwondo, Table Tennis, Badminton, Basketball, Athletics, Volleyball, Dance, Music, Piano, Violin, Art, and other activities that provided students with opportunities to discover, explore, and develop their individual talents and interests.

To extend learning beyond the classroom, students were taken on educational visits to museums and science centres. These visits provided valuable opportunities for students to observe, explore, question, and connect classroom concepts with real-world experiences, thereby making learning more experiential and enriching.

The academic progress of students was monitored through a continuous and comprehensive assessment process, supported by regular assignments, projects, experiential tasks, and

subject-based activities planned by the teachers throughout the academic session. These practices enabled teachers to understand individual learning needs, track progress, and provide appropriate academic support and enrichment.

Recognising the importance of students' emotional well-being and mental health, counselling and guidance sessions were conducted periodically. These sessions focused on fostering emotional resilience, self-awareness, a positive outlook, healthy interpersonal relationships, and a balanced approach towards academics and life.

The school also placed considerable emphasis on the continuous professional development of teachers. During the session, teachers participated in thirteen training programmes conducted by experts in various areas of contemporary education. The programmes included themes such as *Career-Driven Teaching*, *Integrating Social Emotional Learning (SEL) into School Culture*, *Innovative TLMs and DIY Ideas for Engaging Students*, *Integrating Technology in Early Years*, and other relevant areas of pedagogy and professional development. These initiatives strengthened teachers' pedagogical skills and encouraged them to adopt innovative, engaging, and effective teaching-learning practices.

The school celebrated a number of significant cultural, national, and institutional events with great enthusiasm and active participation from students and staff. These included:

1. Rabindra Jayanti
2. Independence Day
3. "Samanvaya" – Annual Day
4. Swami Vivekananda's Birth Anniversary
5. Netaji's Birthday Celebration
6. Republic Day Celebration
7. Saraswati Puja at the School Campus

These celebrations provided students with valuable opportunities to appreciate India's rich cultural heritage, national values, traditions, and diverse forms of artistic expression. They also helped nurture a strong sense of belonging, cultural awareness, confidence, and community spirit among the students.

The school organised six Parent-Teacher Meetings (PTMs) during the academic session, providing a meaningful platform for regular communication and collaboration between parents and teachers. These interactions facilitated discussions on students' academic progress, overall development, strengths, and areas requiring attention, while further strengthening the partnership between the school and parents.

The Academic Session 2025–26 was marked by a sustained focus on academic excellence, experiential learning, creativity, environmental consciousness, emotional well-being, skill development, and character building. Through a balanced blend of academics, co-curricular activities, educational experiences, and value-based learning, the school continued to create opportunities for students to grow as confident and responsible individuals.

The overall development of the students has been encouraging and progressive. They continue to move steadily towards acquiring the essential 21st-century skills, values, competencies, and attitudes required to become responsible, confident, compassionate, creative, and lifelong learners. The school remains committed to nurturing young minds who are globally aware yet deeply rooted in values, culture, and a sense of responsibility towards society and the world around them.
